Server

database
_____

listings.server.controller.js
coordinates.server.controller.js

express

router
middleware

HTTP
Response

HTTP
Request

Window
view

- express accepts request from user
- middleware uses listings to api $ go to homepage in non-specified case routes
- object passed to listings.server.routes $ forwards input to appropriate controller
- router has list, delete, update, etc $ executes
- controller is called to CRUD
- finally passed to window view
